

I am writing on behalf of K-Love Radio and the proposed LPFM broadcast service. In cutting the power that K-Love needs to operate I feel you will be hurting myself and a multitude of people who rely on K-Love for a positive message, not only in my area, but around the world, in a world that is very negative. Currently I am able to pick up the station both at work and home and listen to it 24 hours a day. It is very uplifting and encouraging and when not able to listen I have noticed a difference in my life. I believe that without this station that there will be a multitude of people lost and searching for answers/help for the day and not be able to find them. It is becoming increasingly hard to find a radio station that adults and children alike can listen to without being afraid of hearing obscene conversations or some type of foul language. This station appeals to all ages not just a select few. Again, please do not take away the power that this station needs to reach a dying world.
